

# LED Screens

## Limitless Options...

### Key Features

- High Quality 4.8mm Pitch
- Suitable for indoor or outdoor use
- Modular system, can be setup in a myriad of ways
- Bright and vivid, even in broad daylight

### Complete service

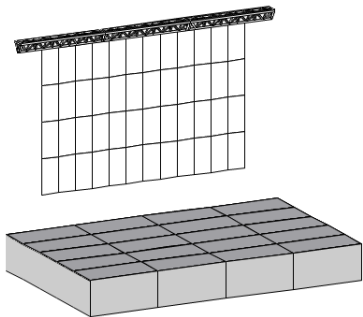

- We install, test and provide full support for our screens
- We can make it as simple as handing you a HDMI cable, or staying on to operate a show of any complexity
- We provide rigging services for all of our screen installations
- To top it off, we can provide complete lighting & vision show design services

# LED Screens

## Some setup options...

We supply screens as a fully installed package. Here are just some of the setup options we can provide, but there is no limit to the possibilities...

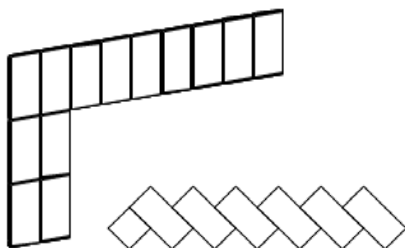

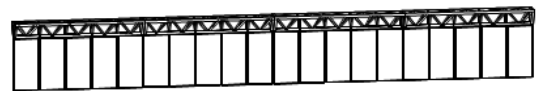

### High Quality Presentation Screen

Widescreen, 4:3, custom ratios and sizes; the standard “rectangle” is great for presentations and video playback, on stage or off.

### Digital Banners

An excellent exhibition and communications tool, a digital banner can be used convey messages and brand content in a modern and vibrant manner.

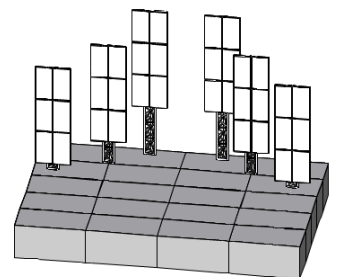

### Custom Shapes

Not all screens need to be a rectangle! Use custom shapes to take creativity to the next level.

### Vertical Columns

Getting a bit more creative, breaking the screen up can increase the “bang for buck” for creative stage designs, allowing cohesive visual imagery to span greater areas with less panels.
